

The Fourth A3 Roundtable Meeting on Asia Chemical Probe Research Hub
November 18th-21st, 2019, Sendai, Japan
Organizer: Prof. Minoru UEDA, Tohoku University, Japan

The Fourth A3 Roundtable Meeting on Asia Chemical Probe Research Hub was held on Nov. 18th – 21st in Sendai, Japan.

This annual meeting was supported by Japan Society for the Promotion of Science, Korea National Research foundation, and National Natural Science Foundation of China. Prof. Minoru UEDA, Tohoku University, Prof. Seung Bum PARK, Seoul National University, and Prof. Jianhua QI, Zhejiang University were the chairpersons of this meeting.

Our 3rd annual meeting ended successfully with excellent talks and great contribution by A3 members. There were 55 oral presentations by the leading researchers, and 25 Postdocs and Graduate Students from China, Korea, and Japan made short oral presentations as well. It was a quite challenging for PDs and students to present their works in front of world-famous PIs, yet this was a great chance for them to learn the level of researchers in Asia. It is worth mentioning this A3 annual meeting provides a platform and opportunity of communication and collaborations for not only the members but also young scientists.

Promising Young Scientists

Finally, Prof. Xiao Guang LEI, Peking University made an announcement for the Fifth A3 Roundtable Meeting on ACPRH to be held in October 2020 in Beijing, China.
